IDENTIFIERS	*Illinois

ABSTRACT

Fall 1988 enrollment data were collected from the 50 Illinois public community colleges and compared with data from earlier years. The colleges reported enrollments at the end of the regular fall registration period and, therefore, did not include students who enrolled during the term. Analyses of the data revealed that: (1) in fall 1988, the colleges enrolled 328,276 students in instructional credit courses, a 1.3% increase from fall 1987; (2) the full-time equivalent enrollment was 166,291, a 3.2% increase from fall 1987; (3) the proportion of full-time students increased from 29.5% in fall 1987 to 29.9% in fall 1988, with almost half of these full-time students enrolled in pre-baccalaureate transfer curricula; (4) the number of both male and female students increased from the previous year, with the number of male students increasing at a higher rate; (5) though black enrollments declined for the fourth consecutive year, overall minority enrollment increased in both numbers and the proportion of total enrollment; (6) the median age of community college students was 27.0 years, and the mean age was 30.7; (7) nearly 43% of the students enrolled had been enrolled at the same college the previous term; and (8) enrollment increases were found in pre-baccalaureate transfer, vocational skills, and remedial/adult basic education/adult secondary education programs. HIGHLIGHTS OF FALL 1988 OPENING ENROLLMENT REPORT

1. At the "end-of-registration" in the Fall 1988 term, the 50 public community colleges in Illinois enrolled 328,276 students in instructional credit courses, an increase of 4,113 students (1.3 percent) from the Fall 1987 term (see page 2).

2. The full-time equivalent (FTE) enrollment in the Fall 1988 term was 166,291, an increase of 5,153 (3.2 percent) from the Fall 1987 term (see page 2).

3. The proportion of full-time students enrolled in community colleges increased from 29.5 percent in the Fall 1987 term to 29.9 percent in the Fall of 1988 (see page 2). Almost half (49.5 percent) of these full-time students were enrolled in pre-baccalaureate transfer curricula (see page 9).

4. The number of female students increased from 190,042 in the Fall of 1987 to 190,854 in the Fall of 1988. The number of male students also increased but at a higher rate (134,121 to 137,422 or 2.5 percent) (see page 4).

5. The overall minority student headcount enrollment for Fall 1988 increased in both numbers and the proportion of total student enrollment in comparison to the Fall 1987 term primarily because of a significant increase in the number of Hispanics and an increase in the number of Asian/Pacific Islanders. The number of black students enrolled in 1988 again declined slightly from a year earlier. This makes the fourth year that the number of black students enrolled has declined (see page 5).

6. The analysis of student enrollment by age reveals that the median age of community college students enrolled in the Fall term of 1988 was 27.0. This was a slight decrease from a median age of 27.4 in Fall 1987 (see page 5). The mean age was 30.7 in Fall 1988 compared to 31.3 in Fall 1987.

7. The number of freshmen enrolled in community colleges increased from 174,819 in the Fall of 1987 to 204,224 (an increase of 16.8 percent) in the Fall of 1988. The number of sophomore students also increased from 53,717 in Fall 1987 to 57,639 in Fall 1988 (see page 6).

8. Nearly 43 percent of the students enrolled in the Fall of 1988 had been enrolled at the same college the previous term. The proportion of students enrolled for the first time increased from 34.0 percent in the Fall of 1987 to 34.7 percent in the Fall of 1988 (see page 7).

9. An analysis of enrollment by instructional program area showed that enrollments increased in pre-baccalaureate transfer, vocational skills, and remedial/ABE/ASE program areas. Over 38 percent of the students enrolled were in pre-baccalaureate transfer programs (see page 8).

INTRODUCTION

Accurate and comprehensive information on community college enrollments is important at the local, state, and national levels. This information is used not only to analyze historical enrollment trends but also for planning future programs, curricula, financing, and facilities. Each college provides the Illinois Community College Board with data on each student enrolled in credit-generating courses. These computerized data are used to produce various reports on student characteristics and curricula enrollments in Illinois community colleges. From this centralized statewide student database, the data needs of both state and national agencies and legislative bodies can be met.

This report focuses on a summary of statewide student enrollment trends and student characteristics in Illinois public community colleges. The analyses are based on Fall 1988 opening enrollments as reported by the colleges at the end of the regular fall registration period (usually the 10th day of the term). These data do not reflect enrollment in courses that begin after the end of the regular registration period. For colleges having two or more modules during a semester, only those students enrolled in the first module are included. Therefore, these enrollments do not include all students who enroll during the fall term. They are, however, comparable counts from year to year and from institution to institution. They are also comparable to fall enrollment data in institutions of higher education throughout the nation.

For comparison with past fall enrollments, summary data for the last five years are presented. In addition to the summary data, a detailed table comparing Fall 1987 and Fall 1988 headcount and FTE enrollments by college is included. Additional enrollment data for each community college will be included in the 1989 edition of the Data and Characteristics of the Illinois Public Community College System.

Student Enrollment by Community College

Fall opening headcount enrollment for 1988 (Fiscal Year 1989) was 328,276, and full-time equivalent (FTE) students totaled 166,291. Table 1 compares these enrollment data with similar data for the previous four years. A comparison of student headcount enrollment for 1988 with data from a year ago shows an increase of 1.3 percent or 4,113 students. FTE enrollment increased 3.2 percent from 161,138 to 166,291. Compared to enrollments in Fall 1984, headcount has decreased by 9.1 percent and FTE enrollment by 5.8 percent.

Table 1

SUMMARY OF OPENING FALL ENROLLMENTS IN
PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1984 TO 1988

	1984	1985	1986	1987	1988
Headcount	361,186	339,782	334,884	324,163	328,276
Percent Change	1.3%	-5.9%	-1.4%	-3.2%	1.3%
FTE	176,466	166,674	166,204	161,138	166,291
Percent Change	-1.5%	-5.5%	-0.3%	-3.0%	3.2%

Table 2 on the next page provides a comparison of 1988 fall opening enrollments with 1987 fall opening enrollments for each community college. Of the 50 colleges, 24 showed increases, 22 showed decreases, and four showed little or no change (1.0 percent) in headcount. FTE increases were reported by 31 colleges, decreases by 17 colleges, and little or no change by two colleges.

Summary of Full-Time/Part-Time Enrollments

A comparison of Fall 1988 full-time/part-time enrollments with those for the past four years showed that the proportion of full-time students declined to the lowest point in 1985 but has increased for the last three years (see Table 3). After experiencing a steady decrease to 28.2 percent in 1985, the proportion of full-time students increased slightly to 28.7 percent in 1986, 29.5 percent in 1987, and 29.9 percent in 1988. The actual number of full-time enrollees increased by 2.6 percent from the same time a year ago while part-time enrollments remained stable.

Summary of Male/Female Enrollments

Table 4 presents a summary of male and female headcount from Fall 1984 through Fall 1988. During this period the male/female student distribution has remained relatively constant with females comprising between 57.6 and 58.6 percent of the total enrollment. The proportion of male students increased slightly in Fall 1988 from a year ago--from 41.4 percent to 41.9 percent. In fact, much of the increase in total enrollment is due to an increase in the number of male students enrolling.

Table 4

COMPARISON OF MALE AND FEMALE OPENING FALL HEADCOUNT ENROLLMENTS
IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1984 TO 1988

	1984	1985	1986	1987	1988
Male	152,420 (42.2%)	142,970 (42.1%)	142,102 (42.4%)	134,121 (41.4%)	137,422 (41.9%)
Percent Change	0.3%	-6.2%	-0.6%	-5.6%	2.5%
Female	208,766 (57.8%)	196,812 (57.9%)	192,782 (57.6%)	190,042 (58.6%)	190,854 (58.1%)
Percent Change	2.0%	-5.7%	-2.0%	-1.4%	0.4%

Summary of Ethnic Origin Enrollments

A comparison of Fall 1988 with Fall 1987 shows an increase in headcount for Asian/Pacific Islanders, Hispanics, and non-resident aliens (see Table 5), which increased by 5.1, 21.6, and 8.2 percent, respectively. Black enrollments continued to decline both in headcount and in their share of the total enrollment. The most noteworthy trend in racial/ethnic enrollments over the last few years has been the declining share of black enrollment compared to the increasing share of Hispanic enrollment. In Fall 1984, blacks represented 18.3 percent of the student population. By Fall 1988, that proportion had fallen to 14.6 percent. Hispanic students comprised 6.1 percent of the total community college enrollments in 1984. This percentage has risen each year to a high of 8.4 percent in 1988. While headcount decreases occurred among American Indian students, their proportional representation remained the same.

Summary of Enrollments by Age Category

After experiencing a decrease between 1985 and 1986 to 19.8 percent, the proportion and number of students under the age of 21 began increasing in Fall 1987 and continued to increase in Fall 1988 to 27.4 percent of the population (see Table 6). The number and proportion of students between the ages of 21 and 30 continued to declined. The number and proportion of

Mean Age	32.4		30.8		31.9		31.3		30.7	

students in the 40 to 55 age group have fluctuated over the last few years. Since Fall 1985 when the number of students over the age of 55 experienced a sharp decline, the older student population had remained relatively stable. However, another substantial decline occurred this past fall when the number of students over 55 decreased by over 15 percent. The increases in the number of younger students under 21 resulted in a slight decrease in both the median and mean age of the Fall 1988 community college population. The median age went from 27.4 to 27.0 years and the mean age from 31.3 to 30.7.

Summary of Enrollments by Student Level

Table 7 summarizes enrollments by student level or classification for the past five years. Freshmen comprised 62.2 percent of all community college enrollments in Fall 1988. This percentage is higher than it has been in the last five years. The number of sophomores, which had held steady for the last three years, increased by 7.3 percent. The number of high school students enrolled in community colleges also increased in 1988, up 2.3 percent from the 1987 level. The number of unclassified students decreased in Fall 1988. Their proportion also decreased, from comprising 29.0 percent of the community college enrollment in Fall 1987 to only 19.7 percent of the enrollment in Fall 1988. (Unclassified students are defined as students who do not meet minimum requirements for entrance as regular college-level students, including students who are enrolled in adult basic or adult secondary education. Students who already have a bachelor's degree or associate degree but who are taking courses at the same or lower level also are considered as unclassified.) In the past some colleges had been coding their incoming freshmen as "unclassified" during the students' first term. While a few colleges continued this practice in 1988, others began classifying their first-time, degree-seeking students as freshmen. This occurrence accounts in part for the decrease in unclassified and the increase in freshmen.

Summary of Enrollments by Enrollment Status

Community college students are assigned to one of four enrollment status categories. First-time students are entering students who have not previously attended any college. In addition to first-time fall students, students who are enrolled in the fall term attending college for the first time during the previous summer are included in this classification. Transfer students are those persons entering the college for the first time with at least 12 hours academic credit earned at another college or university. Continuing students were enrolled at the college the previous term, and readmitted students are those who were enrolled at the college previously but not enrolled the previous term (excluding summer). Table 8 presents a summary of the fall student enrollment status from 1984 to 1988. The proportion of students in each of these categories has fluctuated over the five-year period. The largest proportion of enrollment is comprised of continuing students. Until 1986, more than half of the students enrolled in community colleges had been enrolled the previous year. The last three years have seen a decline below the 50 percent mark. The proportion of first-time students has increased from 31.9 percent in 1984 to 34.7 percent in 1988. The number of transfer students increased by 14.6 percent and was at the highest level in the last five years.

Table 8

COMPARISON OF OPENING FALL HEADCOUNT ENROLLMENTS IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1984 to 1988 BY ENROLLMENT STATUS

Summary of Enrollments in Instructional Programs

A summary of total student headcount enrollments by instructional program areas from Fall 1984 through Fall 1988 is provided in Table 9. Pre-baccalaureate/transfer and occupational students taking courses but not pursuing a degree are shown as course enrollees and are included in the total program

counts. The largest increase in enrollment occurred in the pre-baccalaureate/ transfer area which increased by 8.7 percent or over 10,000 students. This increase resulted in increasing this area's share of the total enrollment to 38.3 percent, the highest it has been since 1978. The general area of remedial/ABE/ASE also increased. The increase of six percent was due primarily to a substantial increase in the number of ABE students. While occupational enrollments decreased, vocational skills enrollments increased. This is the second year in a row this has occurred. Enrollment in vocational skills courses has been increasing steadily for the last several years as the colleges respond to the needs of the business community. Enrollment in occupational programs declined to the lowest number of students since 1979. Substantial declines were experienced in both the general associate degree and general studies areas (declines of 16.5 and 19.6 percent, respectively).

Table 9

COMPARISON OF OPENING FALL HEADCOUNT ENROLLMENTS IN INSTRUCTIONAL PROGRAM AREAS IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1984 TO 1988

Enrollments in Instructional Programs by Full-time/Part-time Status. Table 10 illustrates the distribution of full-time/part-time attendance of students in different instructional programs in Fall 1988. Overall, 29.9 percent of community college students attend on a full-time basis (12 or more credit hours). A comparison of enrollment status among the instructional program areas reveals that the highest percentage (49.5 percent) of full-time students occurs in the pre-baccalaureate/transfer area. Of the pre-baccalaureate students, nearly 39 percent attend on a full-time basis. A slightly higher percentage (39.3%) of the general associate degree students took at least 12 credit hours in the fall term. Thirty percent of the occupational students are full-time enrollees. Vocational skills and general studies certificate students are enrolled primarily on a part-time basis--90.4 and 96.7 percent, respectively.

Table 10

FALL OPENING HEADCOUNT ENROLLMENTS IN INSTRUCTIONAL PROGRAM AREAS
BY FULL-TIME/PART-TIME ENROLLMENT STATUS
FALL 1988

	Full-time	Part-time	Total
General Associate	2,162 (39.3%) 2.2%	3,346 (60.7%) 1.5%	5,508 (100.0%) 1.7%
Pre-Baccalaureate	48,587 (38.7%) 49.5%	77,127 (61.3%) 33.5%	125,714 (100.0%) 38.3%
Occupational	30,858 (30.0%) 31.5%	72,014 (70.0%) 31.3%	102,872 (100.0%) 31.3%

ASE	1,436 (24.9%) 1.5%	4,326 (75.1%) 1.9%	5,762 (100.0%) 1.7%
General Studies Cert.	621 (3.3%) 0.6%	18,140 (96.7%) 7.9%	18,761 (100.0%) 5.7%
TOTAL	98,081 (29.9%) 100.0%	230,195 (70.1%) 100.0%	328,276 (100.0%) 100.0%

Enrollments in Instructional Programs by Male/Female. Examination of male/female distribution in the instructional program areas shows the distribution within the pre-baccalaureate/transfer area (42.2 percent male, 57.8 percent female) and occupational area (42 percent male, 58 percent female) to be similar to the overall student population distribution (see Table 11). In each of the instructional areas, females outnumber males. The highest proportion of males (46.4 percent) occurs in the adult basic education area. The highest proportion of females (66.3 percent) occurs in the general studies certificate area.

Table 11

FALL OPENING HEADCOUNT ENROLLMENTS IN
INSTRUCTIONAL PROGRAM AREAS BY SEX
FALL 1988

	Male	Female	Total
General Associate	2,256 (41.0%) 1.6%	3,252 (59.0%) 1.7%	5,508 (100.0%) 1.7%
Pre-Baccalaureate	53,069 (42.2%) 38.6%	72,645 (57.8%) 38.1%	125,714 (100.0%) 38.3%

General Studies Cert.	6,321 (33.7%) 4.6%	12,440 (66.3%) 6.5%	18,761 (100.0%) 5.7%
TOTAL	137,422 (41.9%) 100.0%	190,854 (58.1%) 100.0%	328,276 (100.0%) 100.0%

Enrollments in Instructional Programs by Racial/Ethnic Origin. Examination of each racial/ethnic category's representation across program areas as presented in Table 12 shows that the largest percentages of white, non-resident aliens, and black students are enrolled in pre-baccalaureate/transfer programs -- 43.1, 44.9, and 30.8 percent, respectively. The highest percentage of American Indian students are enrolled in occupational programs (34.3 percent). Adult basic education enrollments account for the largest percentages of Asian and Hispanic students -- 30.3 and 58.1 percent, respectively. Since English as a Second Language courses are in the ABE program area, the high percentages of Asian and Hispanic enrollments in this area are reasonable.

General Studies Cert. (1.5)	434 (2.3%) 3.6%	39 (0.2%) 3.3%	2,572 (13.7%) 5.5%	648 (3.4%) 2.4%	14,700 (78.4%) 6.3%	19 (0.1%) 3.1%	349 (1.9%) 7.3%	18,761 (100.0%) 5.7%
TOTAL	12,206 (3.7%) 100.0%	1,182 (0.4%) 100.0%	47,167 (14.4%) 100.0%	27,267 (8.3%) 100.0%	235,057 (71.6%) 100.0%	621 (0.2%) 100.0%	4,776 (1.4%) 100.0%	328,276 (100.0%) 100.0%

In the overall student population, the racial/ethnic distribution is as follows: Asian - 3.7 percent, American Indian - 0.4 percent, black - 14.4 percent, Hispanic - 8.3 percent, white - 71.6 percent, and non-resident alien - 0.2 percent. A comparison of the racial/ethnic distribution of the overall student population with that of each of the eight program areas (e.g., pre-baccalaureate/transfer, occupational, etc.) shows that within the General Associate Degree area Asians, American Indians, blacks, and Hispanics had higher representation than they did in the overall student population (7.6 vs. 3.7 percent, 0.5 vs. 0.4 percent, 29.3 vs. 14.4 percent, and 8.5 vs. 8.3 percent, respectively). In the pre-baccalaureate/transfer area only one group -- white -- had a higher proportion of the enrollment than was found in the general population. This was also the case in the occupational area. In vocational skills courses, a higher proportion of Asians and blacks occurred than was found in the general student population. In the remedial area, Hispanic and non-resident aliens had higher proportions. Adult basic and adult secondary education had relatively high proportions of minority students in comparison to the general population. In adult basic education, Asian, black, and Hispanic comprised 10.4 percent, 23.7 percent, and 44.4 percent of the students compared with overall percentages of 3.7 percent, 14.4 percent, and 8.3 percent, respectively. Blacks comprised 34.6 percent and Hispanics 15.2 percent of the students in adult secondary education. White students comprised over 78 percent of the students taking general studies courses.

Enrollment in Instructional Programs by Age. Within the total community college population, 43.1 percent of the students are less than 25 years of age. Table 13 shows that within the various program areas the percentage of students under the age of 25 is as follows: general associate--46.2 percent, pre-baccalaureate/transfer--56.6 percent, occupational--40.4 percent, vocational skills--25.6 percent, remedial--24.7 percent, ABE--31.3 percent, ASE--54.0 percent, and general studies certificate--16.7 percent.

Examination of each age group's representation across program areas shows that 55.2 percent of all students age 17 through 20 and 42.5 percent of all 21 through 24 year old students are enrolled in pre-baccalaureate/transfer programs. The highest percentages of students in the age groups 25-30, 31-39, and 40-55 (35.9 percent, 36.6 percent, and 32.9 percent, respectively) occur in the occupational program area. Over 29 percent of all students over the age of 55 are enrolled in general studies courses. While the largest proportion of students less than 17 years old are enrolled in the pre-baccalaureate/transfer program area (26.9 percent), another 20.0 percent are in ASE courses.

Enrollments in Instructional Programs by CIP. The Fall Curriculum Enrollment Report presented in the appendix provides a listing of enrollments by Classification of Instructional Programs (CIP) codes for Fall 1988. Of the 125,714 pre-baccalaureate/transfer (1.1) students, 27,528 are students taking transfer courses but not pursuing a degree (course enrollees). Of the students pursuing transfer degrees, 63,328 are in Associate in Arts, 31,936 in Associate in Science, and 2,922 in Associate in Arts and Science degree curricula.

Of the 102,872 occupational (1.2) students, 14,359 were taking occupational courses but were not pursuing a degree or certificate. Business data processing (CIP 07.0305) continued to have the largest number of program enrollees with 7,952. However, this was a decrease of 972 (10.9 percent) from a year ago. The second largest curriculum was associate degree nursing (CIP 18.1101) with 6,781 students -- an increase of 816 (13.7 percent) from a year ago. Other curricula with enrollments over 3,000 were accounting and bookkeeping (CIP 07.0101) with 5,742, business administration and management (CIP 06.0401) with 5,559, criminal justice administration (CIP 43.0105) with 4,259, child care aide (CIP 20.0202) with 3,741, and secretarial (CIP 07.0606) with 3,284. In each of these curricula, except nursing and criminal justice, enrollments were lower than they had been in the Fall of 1987. Table 14 shows enrollments in occupational curricula with at least 3,000 students enrolled. Electronic Technology had over 3,000 students in the Fall of 1987 but dropped to 2,715 students this year.

Table 14

COMPARATIVE SUMMARY OF OCCUPATIONAL CURRICULA
ENROLLMENTS OVER 3,000: FALL 1987-1988

Curricula and CIP	Fall 1987	Fall 1988	Number Change	Percent Change
Bus. Data Processing 07.0305	8,924	7,952	-972	-10.9
Assoc. Degree Nursing 18.1101	5,965	6,781	816	13.7
Accounting & Bookkeeping 07.0101	6,157	5,742	-415	-6.7
Business Adm. & Man. 06.0401	6,556	5,559	-997	-15.2
Criminal Justice Adm. 43.0105	4,173	4,259	86	2.1
Child Care Aide 20.0202	3,870	3,741	-129	-3.3
Secretarial 07.0606	3,864	3,284	-580	-15.0

APPENDIX

Fall 1988 Opening Enrollment by Two-Digit Program Classification System (PCS) and Six-Digit Classification of Instructional Programs (CIP) Codes for the Public Community Colleges in Illinois
